Introduction

I am a recent Computer Science undergraduate and keen to expand my experience and learnings with mobile apps in Android, iOS and React Native by working within a multidisciplinary team.

Experience

Mobile developer

Juice Phactree, Canada (Remote)

September 2015 – July 2020

Started working as a freelancer during my first year of undergraduation. Work involved developing, designing and maintaining mobile apps as well as:

- updating designs for various brand portfolios
- programming new mobile apps in Android, iOS and more recently React Native
- fixing problems in mobile apps for Android and iOS
- working on performance, reliability and sustainability of mobile apps
- cloud services integration such as Firebase and AWS mobile hub
- consuming internal and external REST APIs
- writing unit and functional tests

Junior Graphic Designer

Medad Printing & Advertising, Abu Dhabi, UAE

October 2010 – December 2013

Started as an intern during my school education and promoted to the junior role. The internship included:

- working with 3D modelling & graphics using tools like 3Ds Max, Keyshot, Adobe Photoshop & Illustrator

Skills

- Mobile apps development
- Android, Kotlin, Java, React Native, Python, Firebase, HTML, CSS, JavaScript
- Graphic design
- 3D product modelling

Achievements

- App Dev Competition Winner
SOFTEC-19 FAST-NU

Career Development

- *Event Organizer*
Annual Get Together 2k15 - Minhaj University Lahore
- *Speaker (Introduction to Kotlin)*
Google I/O Extended Lahore 2019
- *Speaker (Build Android Apps the fun way)*
Tech Tology Lahore Chapter Launch
- *Speaker (Understanding Git and GitHub)*
Tech Tology Lahore Chapter
- *Speaker (Do More with Firebase)*
Devenings & Tech Tology Lahore Chapter

Interests

Blogging, Learning, Coding, Teaching, Speaking, Music

- working on various business branding & 3D product modelling
- designing a concept 3D model of a donation box for Red Crescent that was shortlisted for prototype build and used for just over 2 years

Education

BSc Computer Science (Hons)

Minhaj University Lahore, Pakistan

April 2015 – April 2020

Intermediate in Computer Science

Sheikh Khalifa Bin Zayed Arab Pakistani School, Abu Dhabi, UAE

September 2011 – September 2013

Projects

During my own time, I like to learn by building different ideas into digital products. Here are some of the examples I have worked on.

Lay Ao

Android, Kotlin, Algolia Search, Firebase (Firestore, Authentication, Cloud Functions, App Distribution)

Lay Ao is a grocery shopping app that consists of multiple features like cart, favorite lists, search and order tracking.

Loan Manager

Android, iOS, React Native, SQLite

Loan Manager is a loan tracking app where users can add, manage and track information about their loans.

COVID-19 Status

Android, iOS, React Native, REST APIs

A mobile app that provides up-to-date statistics about Coronavirus (COVID-19) pandemic. It sources the data by consuming different APIs available publicly.

Random Quote Machine

ReactJs, Web, HTML, CSS

A web app part of the 100 Days of Code Challenge which generates random quotes.

Roman Numeral Converter

JavaScript, Web, HTML, CSS

A web app part of the 100 Days of Code Challenge which converts numbers to roman numerals.
