EXPERIENCE

Heritage Education Consultants, Lahore — *Front-End Developer*

August 2019 - September 2019

I am responsible for implementing visual elements that users see and interact within a web application. In general, they are supported by back-end web developers, who are responsible for server-side application logic and integration of the work I do.

Team Android, Lahore — *Tech Blogger*

April 2019 - June 2019

Design and edit news for reading by anchors and communicate appropriate stories to audience. Develop bridges and other articles to broadcast during interval of news stories. Perform copy editing of scripts for accuracy, factual content and correct language.

Juice Phactree, Canada (Remotely in Lahore, Punjab, Pakistan) — *Android UI/UX Designer*

September 2017 - October 2018

Working as a User Interface/Experience Designer my responsibilities included visualizing & developing an interface for a product. Providing better & smooth user experience was my primary responsibility.

Medad Printing & Advertising, Abu Dhabi, U.A.E — *Junior Graphic Designer*

October 2012 - December 2012

Started as a trainee, officially promoted to Junior Graphic Designer. The internship included working on 3D modeling & Graphic using tools like 3Ds Max, Keyshot, Adobe Photoshop & Illustrator. I worked on various business branding & 3D product modeling. I also designed a 3D model concept of a donation box for Red Crescent U.A.E that was shortlisted for prototype build.
